Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. **Claims 1-3** are rejected under 35 U.S.C. 103(a) as being unpatentable over Masuda et al (US 4250421) in view of JP 5-299221 (hereafter JP'221).

Masuda discloses a stepping motor having a rotor is formed by molding a mixture of powder magnet and resin. Masuda substantially discloses the claimed invention, except for the magnetic power to be SmFeN material.

JP'221, however, teaches the use of Sm-Fe-N magnet powder to form a magnet to that can be used in a rotor or a stator of a small motor. The SmFeN magnet powder has excellent

magnetic characteristics, and bond magnets are known for the mechanical elasticity and high performance.

Thus, it would have been obvious to one skilled in the art at the time the invention was made to modify the Masuda stepping motor having a molded rotor formed of a mixture of Sm-Fe-N magnet powder and resin, as taught by JP'221. Doing so would improve the magnetic characteristics of the rotor resulting in enhance performance thereof.
